FOFG 1920 MCFPG  
(Ed. 7/03)

Medco Health is your pharmacy benefit manager at the request of your plan sponsor.

## THE BENEFITS OF RX SELECTIONS™

**Rx Selections** is a list of medications that may be covered under your prescription drug plan. This list was reviewed by an independent group of practicing doctors and pharmacists, and it contains medications made by most pharmaceutical manufacturers. It includes medications for many covered conditions.

### SAVING MONEY ON PRESCRIPTIONS

Your plan may prefer some medications over others. These are called *plan-preferred drugs*, and their co-payment is lower. The amount of your co-payment depends on which drug your doctor prescribes for you.

*You may pay:*

- Lowest co-payment for generic drugs
- Higher co-payment for plan-preferred, brand-name drugs
- Highest co-payment for nonpreferred, brand-name drugs

**Your doctor may be able to help you save money by prescribing generic and plan-preferred drugs. So be sure to bring this guide with you on every visit to your doctor.**

This guide lists only the most common drugs. For an updated and complete listing of plan-preferred drugs, you can visit the “My Benefits” section of our website — [www.medcohealth.com](http://www.medcohealth.com) and click the [Learn about formularies](#) link.

### FINDING LOWER CO-PAYMENT VERSIONS

This guide lists medications two ways to help you find some generic and plan-preferred brand-name drugs.

#### ALPHABETICALLY BY DRUG CATEGORY (SUCH AS RESPIRATORY)

Within each category, medications are listed in order of their cost to your plan sponsor, from lowest to highest. The \$ and ! symbols next to each medication show the cost of that medication compared with others in the same category:

#### ALPHABETICALLY BY BRAND NAME

After each nonpreferred brand-name drug, you will find possible generic and plan-preferred brand-name versions.

### GENERIC COVERAGE

When a generic version of a brand-name drug is available, it will have one of the following symbols:

- + Means only the generic version is plan-preferred; the brand-name product has the highest co-payment.
- ⊕ Means both brand-name and generic versions are plan-preferred, but the generic version has a lower co-payment.

### SAFETY CONSIDERATION SYMBOLS

Here is a quick guide for you and your doctor, which explains our safety symbols. These symbols appear next to certain medications.

- ↓ Means that a dose lower than the manufacturer’s guidelines is often recommended for people 65 and older.
- ▲ Means that use by people 65 and older is associated with increased risk; safer alternatives may be available. If used, dosage should generally be lowered.
- ⊕ Weigh risk of birth defects or other adverse outcomes.
- ⊗ Do not use in pregnancy.

*This information is in effect at the time of printing, and may be subject to change.*

## SECTION I: THERAPEUTIC DRUG CATEGORIES

<b>ANTI-INFECTIVES</b> (Antibiotics/Antifungals)
